

Greetings members of the association.

The Weather Modification Association would like to invite a call for papers for the WMA Annual meeting taking place the week of April 15th, 2024, at the MGM Grand in Las Vegas, NV. Abstracts will be received now through the 22nd of March, but the sooner the better!

Topics: Weather Modification Operations, Weather Modification Research, Evaluations of Weather Modification Projects, Economic Benefits of Weather Modification Operations/Research, Weather Modification Education and Outreach, Instrumentation used for Weather Modification Operations and Research, Advancements in Modeling for Weather Modification Operations and Research, among other related weather modification topics.

*Please provide an abstract and feel free to **request a duration of time** as I am hoping to bring quality over quantity to this year's meeting!*

Posters: If you would like to bring a poster, we'll put those up on the walls and provide a poster session during an extended break. The time allotted for the poster session will be determined by the amount of poster submissions we receive.

Remember, this year's meeting will be a bit different, with day one being a full day, and day 2 having a half day, lunch, and then the business meeting after lunch, before the banquet. This will allow folks to join a Hoover Dam Tour (likely on their own) if wanted on day 3. Dates and tours are still being further looked into.

Best Regards,
Jonathan Jennings
